TotalStream
PO Box 41270
5190 Neal Road Suite 430
Reno, NV 89504
(877) 640-6608

TotalStream's Live Streaming services can stream your sports, music or entertainment event to thousands of users across the country. In addition to live events, we can store your programs on our servers to run on future dates or to run at the same hour in each time zone (for example 8 p.m. EST, CST and PST)

We stream all of our programs using Windows Media. The Windows Media Player is widely distributed, supported on both the PC and Macintosh platforms and is freely available from Microsoft.

BENEFITS

Save Money

With Totalstream you only pay for what you use - in clear and simple terms. We measure the number of gigabytes transferred per month, and that's what you pay for. There is no complex pricing based on megabits per second (Mbps), or 95th percentile models, which may not fit your business.

Protected Content

By utilizing our Digital Rights Management (DRM) services your content is protected from theft - increasing its value and lowering your bandwidth bills.

Grow Your Business

Lower your streaming costs by avoiding investing and maintaining equipment and manpower.

Avoid Overhead

By utilizing TotalStream services your company avoids the continual purchase of new equipment and rack space as your bandwidth needs increase. Rather than investing in additional web or streaming servers and paying rent for space or T1/T3 lines, your budget is freed up to increase your sales or marketing efforts or to reap larger profits.

Grow your audience

By utilizing our widely connected network, TotalStream customers have seen traffic increases of more than 40%.

Simplify your workflow.

Just encode and stream your content and let TotalStream do the rest.

TotalStream Totally Committed
to Excellent Service
